

01

Executive Overview & Website Positioning

This modern portfolio website has been engineered specifically for **Nityam Singh** to establish a premium, authoritative digital presence at the intersection of **Human Resources, AI Intelligence, and Modern Technology**.

 **Strategic Positioning**

Title: HR Professional | AI & HR Tech Enthusiast

Tagline: *Connecting People, Technology & Business through Modern HR.*

Designed to attract senior HR leaders, recruiters, consulting clients, and technology collaborators.

 **Core Engineering Principles**

Framework: Next.js 16 (App Router) + React 19

Design System: Tailwind CSS v4, Motion (Framer), Editorial Canvas

Optimization: Zero-bloat assets, instant load times, SEO-ready metadata, and 100% mobile-friendly responsive layout.

02

Complete Website Sections (A to Z Walkthrough)

The website is structured into 7 distinct, cohesive sections without redundant elements:

SECTION	VISUAL & INTERACTIVE FEATURES	BUSINESS PURPOSE & CONTENT
1. Hero Header	- Day & Night Video Switch - Live Location & Weather Widget - Sticky Navigation Bar	First-impression banner establishing Nityam's authority. Highlights availability with a live pulse indicator and the primary "Appoint a Call" CTA.
2. Practice Areas	5-column editorial ticker strip	Quick glance at core focus: Talent Acquisition, HR Operations & HRIS, AI & HR Tech, People & Culture, Data & Analytics.
3. HR + AI Pipeline	- Interactive visual flow banner 7-second auto carousel timer - Ambient shifting glow	Walks visitors through Nityam's philosophy: People → Data → AI → Automation → Better Decisions with dedicated cards for each stage.
4. Skills & Knowledge	3 themed card pillars with chips	Displays all 9 required competencies: Talent Acquisition, Compliance (PF & ESIC), Payroll, No-Code App Dev, SQL & Excel, and AI Intelligence.
5. Career Timeline	- Current role active ping - Responsibilities & Impact cards	Showcases career milestones at Genpact (Current Role), NetAmbit , and MAS Callnet India with key quantifiable achievements.

SECTION	VISUAL & INTERACTIVE FEATURES	BUSINESS PURPOSE & CONTENT
6. Strategic Approach	• 4–step sequential path line	Explains Nityam's working methodology: 1. Understand Needs → 2. Design Workflows → 3. Leverage AI → 4. Refine for Engagement.
7. HR & Tech Stack	• macOS code editor terminal UI	Visual proof of tools used: HRIS platforms, ATS pipelines, Excel, SQL, automation engines, and compliance tools.
8. About & Contact	• Profile photo & career focus • Dual-channel appointment form • Social media hub	Personal statement, contact details, social links (LinkedIn, X, Instagram, Snapchat), and the "Appoint a Call" interactive booking form.

03 The Dual-Channel Appointment Booking System

The "**Appoint a Call**" system has been engineered with two simultaneous notification channels so Nityam Singh receives client leads instantly:

Channel 1: Automated Background Email

- **Target Email:** nityamkumarsingh31@gmail.com
- **Subject:** *New Call Appointment Request - Nityam Kumar*
- **How it works:** Upon form submission, the website executes a background API call via `/api/appoint`. An automated HTML email is sent with all 8 fields neatly formatted in a table.
- **Spam Protection:** Captcha-free serverless validation ensures prompt delivery directly to Gmail.

Channel 2: Direct WhatsApp Instant Alert

- **Target WhatsApp:** +91 88828 45860
- **On the Form:** A "Book via WhatsApp" button allows visitors to open WhatsApp immediately with their details.
- **On Confirmation:** A prominent green button "**Notify Nityam on WhatsApp Directly (1-Click)**" lets the client alert Nityam immediately.
- **Compatibility:** Opens natively in the WhatsApp mobile app or WhatsApp Web on laptops.

Pre-Formatted WhatsApp Message Template

When the client clicks the WhatsApp button, WhatsApp automatically opens with this ready-to-send card:

```
*New Call Appointment Request - Nityam Kumar*

*Name:* [Client's Full Name]
*Email:* [client@company.com]
*Phone:* [+91 98765 43210]
*Company:* [Organization Name]
*Purpose of Call:* [e.g. Talent Acquisition / HR Tech Consultation]
*Preferred Date:* [2026-10-15]
*Preferred Time:* [14:00]
*Message:* [Client's consultation notes or agenda]
```

04 Easy Content Management (How to Update in Future)

To make future updates effortless, all personal details, social URLs, job roles, skills, and settings are organized in a single configuration file:

📁 `lib/content.ts` (Centralized Site Configuration)

```
// How to update your details in lib/content.ts:
export const SITE_CONFIG = {
  name: "Nityam Singh",
  email: "nityamkumarsingh31@gmail.com",
  phone: "+91 88828 45860",
  whatsappNumber: "918882845860", // Country code + number
  social: {
    linkedin: "https://www.linkedin.com/in/nityam-rajput-9a6b36307/",
    twitter: "https://x.com/nityam__rajput",
    instagram: "https://www.instagram.com/nityam__rajput/",
    snapchat: "https://www.snapchat.com/add/thenityam12",
  }
};
```

05 Deployment, Hosting & Custom Domain Guide

GitHub Repository

Repo URL: github.com/sumitwork06-code/portfolio

- Clean, non-shallow Git history.
- Staged with all 66 source and asset files.
- Branch `main` is deployment-ready.

Vercel Live Deployment

- **Free Tier:** Includes instant global CDN, automatic SSL certificates, and zero maintenance fees.
- **Live Link:** Immediately accessible via your free `.vercel.app` address.

How to connect your custom domain (e.g. nityamhr.in) when purchased:

1. Purchase nityamhr.in from GoDaddy or Hostinger (~₹399–₹499/yr).
2. In your domain registrar's DNS dashboard, add:
 - **A Record:** Host `@` → Points to `76.76.21.21`
 - **CNAME Record:** Host `www` → Points to `cname.vercel-dns.com`
3. In Vercel → Settings → Domains, enter nityamhr.in and click **Verify**.
